SUMMARY

Computer Science student (UNLP) building full-stack web applications with React, Node.js and Next.js/TypeScript. Delivered two projects featuring real-time WebSockets, concurrency-safe booking logic and 90+ automated tests. Seeking a trainee/junior role in backend or full-stack development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React 19, Next.js 16, Tailwind CSS

Backend & data: Node.js, Express, Socket.io (WebSockets), Prisma, SQLite

Testing: Playwright (E2E), Vitest, unit and integration testing

Tools: Git, Linux

Learning: Docker, PostgreSQL

PROJECTS

Comanda — **Real-time QR table ordering for cafés**
React 19 · Node.js · Express · Socket.io · SQLite

- Three views synchronized over WebSockets: customer (table QR code), kitchen and counter.
- Separate domain layer covered by unit tests, plus 22 end-to-end tests with Playwright.
- Authentication with revocable sessions and login throttling; single-service deployment.

Filo — **Multi-tenant SaaS for barbershop online booking**
Next.js 16 · React 19 · TypeScript · Prisma · Tailwind CSS · github.com/peri294/Filo

- Bookings with database-level concurrency control to prevent double-booking.
- SMS-verified authentication (Twilio), role-based access and rate limiting.
- 68 integration tests with Vitest.

Data portal (academic) — **Multi-page analytics portal, defended at a university colloquium**
Python · Streamlit · Plotly Express · Folium

- Interactive filters, maps and charts, with activity logging.

EDUCATION

BSc in Computer Science (Licenciatura en Informática)
Universidad Nacional de La Plata (UNLP), Argentina
2023 – Present (in progress)

COURSES

Cybersecurity – Coderhouse · 18 hours over 9 weeks · May 2025

LANGUAGES

Spanish: Native · English: Intermediate (B1–B2)
